A

AB Svenska Metallverken: *Secondary Recrystallization in Copper Wire* 533
Abersold, J. N., and Nelson, K. W.: *Industrial Hygiene at American Smelting and Refining Company* 33
Correction 146
Activation Energy for Recrystallization in Rolled Copper. Discussion 548
Ageev and Guseva: electronic density in metallic aluminum: discussion of their work 556
Age-hardening: copper-rich copper-tin-beryllium alloys 782
effect of ternary additions on 174
Aging Characteristics of Magnesium-Lithium Base Alloys. Discussion 560
Aging in iron, change in yield strength 1179
Aging of Sand-Cast Mg-Al-Zn Alloys 120
Air Materiel Command, sponsor: *Systems Titanium-Molybdenum and Titanium-Columbium* 881
Air Reduction Sales Co.: *Desulphurizing Molten Iron with Calcium Carbide* 313
Alcoa combination process compared to others 1140
Alexander, B. H., and Rhines, F. N.: *Dendritic Crystallization of Alloys. Discussion* 561
Alloy systems: refractory monocarbides TiC-VC-ZrC, TaC-VC-ZrC, and NbC-VC-ZrC, solubility relationships 923
ternary, of transition elements, intermediate phases 872
Ti-Mo and Ti-Cb, phase diagrams 881
Alumina, Bayer processes for extraction of 391
from Haiti and Jamaica bauxites, extraction of 389
Kalunite production vs. Bayer 634
Pedersen and related processes for extraction of 389
resources in Arkansas from low grade bauxites and clays 1138
Aluminum and aluminum alloys: Aluminum-copper solid solutions, kinetics of precipitation 477
aluminum-copper system, diffusion 155
aluminum-killed steels, precipitation of aluminum nitride in 1174
aluminum-magnesium-zinc alloys, sand-cast, aging 120
aluminum-manganese-magnesium, equilibrium relations 797
aluminum nitride precipitation 1174
aluminum-uranium, crystal structure of UAl_4 800
aluminum-zinc, solid solution, kinetics of precipitation 477
bronze isothermal transformation and properties 903
constitution Ti-Al alloys 1150
creep and stress rupture behavior as a function of purity 909
deformed in creep at elevated temperatures: structure 917
dendritic crystallization. Discussion 561
effect of alloying elements on plastic properties of alloys. Discussion 556
effect of alloying elements on elevated temperature plastic properties of alpha solid solutions 643
effect of alloying elements on resistivity 457
effect of precompression on aluminum alloy 24ST4 452
electron density distribution in lattice 457
electronic density: work of Ageev and Guseva discussed 556
grain boundary migration, deformed in creep 918
grain boundary migration, rates 662
grain refinement mechanism 1143
Linde's rule applied 457
metallographic techniques for high purity aluminum 473
nitride: role in recrystallization of aluminum-killed steel 722
plastic behavior of aluminum single crystals. Discussion 545
production from Kalunite alumina 634
single crystals, plastic deformation 653
solid solutions, plastic properties 643
strain markings. Discussion 547
valence in ionic solids and in metallic state 457
work hardening, effect of magnesium 644
Aluminum Research Laboratories: *Equilibrium Relations in Magnesium-Aluminum-Manganese Alloys* 797
American Smelting and Refining Co.: *Electric Furnace Melting of Copper at Baltimore* 468
Industrial Hygiene at American Smelting and Refining Company 33
Sulphur Activities in Liquid Copper Sulphides 235
American Zinc Co. of Illinois: *Reverse Leaching of Zinc Calcine* 134
Analytical Representation of Certain Phase Boundaries 1203
Anderson, R. A., Sherby, O. D., and Dorn, J. E.: *Effect of Alloying Elements on Elevated Temperature Plastic Properties of Alpha Solid Solutions of Aluminum* 643
Andrade furnace, modified 461
Angier, R. P., Hausner, H. H., and Kalish, H. S.: *Powder Metallurgy of Zirconium* 625
Annealing processes in zinc. Discussion 541
Annealing textures, theory of 475
Annealing twins, formation of. Discussion 1068
Anode furnace, copper refining 233
Arant, N. R.: *Discussion on Oxidation during Tapping and Ladle Filling* 1055
Arc Melting of Titanium Metal 620
Discussion 1046
Arc melting, continuous casting furnace 620
Armco Steel Corp.: *Grain Structure of Aluminum-Killed, Low Carbon Steel Sheets* 721
Armour Research Foundation: *Analytical Representation of Certain Phase Boundaries* 1203
Correlation Between Electrical Conductivity and Temperature Coefficient of Resistance of Solid-Solution Alloys 1184
Eutectoid Decomposition of the Delta Phase of the Copper-Tin System 1212
Systems Titanium-Molybdenum and Titanium-Columbium 881
Atkinson, R. H., and Furman, D. E.: *Creep Characteristics of Some Platinum Metals at 1382°F* 806

Atomic Energy Commission Contract: *Preferred Orientation of Zirconium* 994
Atomic Relationships in the Cubic Twinned State 53
Discussion 1070
Austenite, determining grain size in as-cast steel 1029
solubility of cementite in, compared with graphite 1015
Averbach, B. L., and Underwood, E. E.: *Vapor Pressures of Zinc Over AuZn Alloys* 1198
Azou, P., and Bastien, P.: *Discussion on Hydrogen Embrittlement of SAE 1020 Steel* 559

B

Babcock, D. E.: *Discussions: on Desulphurizing Molten Iron with Calcium Carbide* 1051
on *Distribution of Sulphur Between Liquid Iron and Slags of Low Iron-Oxide Concentration* 1050
on *Effects of Manganese and Its Oxide on Desulphurization by Blast-furnace Type Slags* 1048
on *Effect of Silica Reduction on Desulphurizing Power of Blast-furnace Type Slags* 1050
on *Thermodynamic Study of Reaction CaS + H$_2$O ⇆ CaO + H$_2$S and Desulphurization of Liquid Metals with Lime* 1047
Backofen, W. A.: *Deformation and Recrystallization Texture of Cold-Drawn OFHC Copper Wire* 250
Torsion Texture of Copper. Discussion 1062
Bacon, C. H.: *Discussions: on Desulphurization of Pig Iron with Pulverized Lime* 1053
on *Oxidation during Tapping and Ladle Filling* 1054
Bacon, C. H., Robertson, F. L., and Till, J. W.: *Low Sulphur Steel from High Sulphur Raw Materials and Fuel* 1031
Discussion 1043
Baen, S. R., and Duwez, P.: *Constitution of Iron-Chromium-Molybdenum Alloys at 1200°F* 331
Baeyertz, M., Craig, W. F. Jr., and Bumps, E. S.: *Effect of Ferrite Grain Structure on Impact Properties of 0.80 Pct Carbon Spheroidite. Discussion* 1064
Bain, J. W., Brower, T. E., and Larsen, B. M.: *Oxygen in Liquid Open-Hearth Steel—Oxidation during Tapping and Ladle Filling. Discussion* 1054
Balicki, M.: *Discussion on Activation Energy for Recrystallization in Rolled Copper* 348
Balicki, M., and Leeds, G.: *Work Hardening-Reannealing Cycle of Pure Silver* 981
Banerjee, B. R.: *Study of Strain Markings in Aluminum* 547
Barley Shell Structure in Iron-Silicon Alloys 412
Barnes, R. S., and LeClaire, A. D.: *Discussion on Interface and Marker Movements in Diffusion in Solid Solutions of Metals* 1060
Barrett, C. S., Bowles, J. S., and Guttman, L.: *Crystallography of Cubic Tetragonal Transformation in the Indium-Thallium System. Discussion* 1057
Bassi, G.: *Secondary Recrystallization in Copper Wire* 533
Bastien, P., and Azou, P.: *Discussion on Hydrogen Embrittlement of SAE 1020 Steel* 559
Battelle Memorial Institute: *Constitution of Titanium-Aluminum Alloys* 1150
Effects of Tungsten or Molybdenum upon Alpha-Beta Transformation and Gamma Precipitation in Cobalt-Chromium Alloys 897
Titanium-Boron Alloys 335
Baukloh, W.: *Discussion on Hydrogen Solubility in Aluminum and Some Aluminum Alloys* 561
Baumer, S. D., and Hulme, P. M.: *Desulphurizing Molten Iron with Calcium Carbide* 313
Discussion 1051
Bauxites: Arkansas reserves 1138
Haiti and Jamaica, extraction of alumina from 389
Bayer alumina, composition and properties 634
Bayer processes for extraction of alumina from bauxites 389
for low grade ores 1138
Beattie, C. W., and Solter, R. L.: *Grain Structure of Aluminum-Killed, Low Carbon Steel Sheets* 721
Beck, P. A.: *Origin of Cube Texture in Face-Centered Cubic Metals* 474
Theory of Annealing Textures 475
Beck, P. A., et al: *Intermediate Phases in Ternary Alloy Systems of Transition Elements* 872
Becker, J. J.: "Oriented Growth" in *Primary Recrystallization* 115
Bell Telephone Laboratories: *Atomic Relationships in the Cubic Twinned State* 53
Effect of Heat Treatment on the Electrical Properties of Germanium 39
Thermal Variation of Young's Modulus in Some Fe-Ni-Mo Alloys 761
Transitions in Chromium 56
Beryllium bronze, eutectoid, isothermal transformation. Discussion 553
Besshi Mining Co., Ltd.: *Metallurgy of Cobalt Production From Cupriferous Pyrite* 445
Beta radiation, effect on diffusion 144
Beta to gamma inversion, oxides as preventives in extraction of alumina 390
Beta transformation, gold-cadmium alloy 47
Binary systems, phase boundaries 332
Birchenall, C. E., and Davies, M. H.: *Oxidation of Titanium* 877
Birchenall, C. E., Davies, M. H., and Simnad, M. T.: *On the Mechanism and Kinetics of the Scaling of Iron* 889
Birchenall, C. E., and Ruder, R. C.: *Cobalt Self-Diffusion: A Study of the Method of Decrease in Surface Activity* 142
Blast furnace: desulphurization of pig iron with pulverized lime 732, 739
discussion 1052
desulphurizing molten iron with calcium carbide. Discussion 1051
iron oxide in desulphurization of iron 319
lead, dust control 35
sulphur, distribution between liquid iron and slags of low iron-oxide concentration. Discussion 1050
Blast-furnace gas, solution loss and reducing power of 37
discussion 1053
Blast-furnace performance and furnace efficiency: corrected CO/CO$_2$ ratio 742
Blast-furnace salamander, structure of yellow crystalline fraction of 393
Blast-furnace slag, desulphurization by, effects of manganese and its oxide 666
discussion 1048
desulphurizing power, effect of silica reduction 672
discussion 1049
Blast furnace sulphur problem 1163
Bloom, D. S., and Grant, N. J.: *Chromium-Nickel Phase Diagram* 1009
Boltzmann equation, when applicable 552, 553
Borelius, G.: *Kinetics of Precipitation in Supercooled Solid Solutions* 477
Correction 1008
Borie, B. S. Jr.: *Crystal Structure of UAl$_3$* 800
Boron-titanium alloys 335
Bowles, J. S.: *Metallographic Study of the Martensite Transformation in Lithium* 44
Discussion 1056
Bowles, J. S., Barrett, C. S., and Guttman, L.: *Crystallography of Cubic Tetragonal Transformation in the Indium-Thallium System. Discussion* 1057
Boyce, J. F., and Fisher, R. M.: *Discussion on Effect of Ferrite Grain Structure on Impact Properties of Spheroidite* 1064
